Adaptations, extensions and new developments of CAD, cloud and other technical solutions	request an individual offer							

License notes

For using the software on a workstation a software license is required. If the software should be used simultaneous on several workstations then software licenses are required for all workstations. There is no price difference between first and additional licenses.

License model

All of our products are delivered as „floating licenses“, managed by a license server. Inside of the company network these licenses can be used on any number of workstations as long as the permitted number of existing licenses will not be exceeded.

Program protection

All licenses for the solutions for Creo Elements/Direct Modeling are managed with the help of passwords by the license server that is also used for Modeling. When changing the license server to a new hardware ID, new passwords are required. The license change from the old license will be made for free.

Purchase Licenses or Subscription (Rental) Licenses

Software licenses can either be purchased (see Purchase Licenses) or rented for a certain period of time (see Subscription/Rental licenses). Software maintenance is already included in the cost of software rental (update authorization, support services). For purchased licenses, these services must be ordered separately as part of a maintenance contract.

Updates without change of the main version

Updates inside of a main version, e.g. from version 1.0 to version 1.1 are possible without any license costs. Downloads are available from our web site or your local reseller.

Updates with change of the main version, maintenance

Updates with a change of the main version, e.g. from version 1.0 to 2.0 are only available with an active maintenance contract. A maintenance contract includes the right to use the newest software version (Updates) and additional phone, email and remote support for one year, or the individual regulations of your contract. If there will be no timely cancellation to the end of the time of validity the maintenance will be automatically renewed for more 12 months. A maintenance contract for the first year must be ordered obligatory with the order of the software license. Subsequent entry into software maintenance is only possible under the Return-To-Support (RTS) scheme.

Updates without maintenance, Return-To-Support (RTS)

With the Return-to-Support (RTS) arrangement customers without an active maintenance contract have the possibility to enter subsequently into an maintenance contract. The RTS fee contains the re-entry into a maintenance contract and additionally a maintenance contract for the following year.

Trainings

Training courses can either be carried out in our training center in Siegen, on-site at the customer's premises or as online training.

For individual trainings the costs apply per training, regardless of the number of participants. The number of participants should not exceed 4-6 participants to ensure an optimal individual support. If there are more participants, an individual training concept should be worked out.

In the case of classroom training, the costs per participant apply.

In the case of external training courses that do not take place in the Siegen training center or online, travel costs (travel costs, accommodation and expenses) are added to the training costs in accordance with our charging rates applicable at the time.

Prices

All prices are official sales prices for the region, named in the title.

- all prices are exclusive of taxes and charges applicable to the respective sales territory, e.g. sales tax or delivery charges
- All orders are following our terms of delivery and payment
- All data subject to any possible errors
